In 1966, Toyota introduced a new compact model called the Corolla, which had a 1.1 liter engine and rear-wheel drive transmission. The profit from sales of this model allowed Toyota to solve one of its main problems - the development of efficient and inexpensive power units, thanks to the purchase of a controlling stake in

across the Australian automotive industry, BorgWarner would have to be it. As with its huge range of transmissions, BorgWarner (BW) differentials have been fitted to more Aussie cars than any other type. Chryslers, Fords, Holdens, Commodores and even some Australian-built Nissans had BW solid axles under the rear.
