Agents are Brother software services running on remote computers. These Agents collect device information from their local LAN. This information is stored on the hard disk of the PC running the Agent software. The information is passed to the server software which can then display the device status. For more information on Agents, click here.

The EJ201 and EJ202 engines had an aluminium alloy cylinder head with cross-flow cooling. Unlike the EJ20 engine, the intake ports for the EJ201 and EJ202 engines created a 'tumble swirl' motion for air as it entered the cylinder for better mixing of the air and fuel for more uniform flame travel and faster combustion.
