### Global Health Nursing: Building and Sustaining ...

Description: This book on global health nursing covers such pertinent issues as cultural context, relationship building, and program development. Purpose: The focus on the relationship building component of global health is worthwhile, although I am not completely convinced that an entire book needs to be devoted to this aspect. However, if this is one's lifework, the book adequately addresses all components of building these relationships and nurturing them to the fullest potential.

### Global Health Nursing: Building and Sustaining ...

The editors of Global Health Nursing outline strategies, implications for advancement of nursing in other countries and populations, and ethical considerations regarding global health and population health. Case studies are interspersed throughout the text, supporting the claim that "partnership is the central element of global health nursing" (Upvall & Leffers, 2014, p. xviii).
