Chapter 4, 'Organometallic Heterocyclic Chemistry', has: (i) a general overview of heterocyclic organometallic chemistry, but most examples are to be found in the individual ring chapters, (ii) the use of transition metal-catalysed reactions that, as a consequence of a regularity and consistency that is to a substantial degree independent of the heterocyclic ring, is best treated as a whole, and therefore most examples are brought together here, with relatively few in the ring chapters.
