The Role of Management Information Systems | Smartsheet

A management information system (MIS) is an information system used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization. The study of the management information systems involves people, processes and technology in an organizational context. In a corporate setting, the ultimate goal of the use of a management information system is to increase the value and profits of the business.

Management information system - Wikipedia

A management information system is an advanced system to manage a company's or an institution's information system. It is a computerized database to organize and program in such a way so that it generates methodical reports for each level of a company.
