Chapters. This Guide is divided into several chapters: Introduction. About this guide About JavaScript JavaScript and Java ECMAScript Tools Hello World. Grammar and types

## JavaScript Guide - JavaScript | MDN

JavaScript (JS) is a lightweight, interpreted, or just-in-time compiled programming language with first-class functions. While it is most well-known as the scripting language for Web pages, many non-browser environments also use it, such as Node.js, Apache CouchDB and Adobe Acrobat. JavaScript is a prototype-based, multi-paradigm, single-threaded, dynamic language, supporting object-oriented, imperative, and declarative (e.g. functional programming) styles.

## Is MDN (Mozilla Developer Network) enough to learn web ...

Starting with ECMAScript 6, JavaScript gains support for the Proxy and Reflect objects allowing you to intercept and define custom behavior for fundamental language operations (e.g. property lookup, assignment, enumeration, function invocation, etc). With the help of these two objects you are able to program at the meta level of JavaScript.

## Meta programming - JavaScript | MDN

Web developer documentation. Mozilla developer; web developer end user. This page provides links to documentation for web developers (people who write web pages) who are interested in the languages used to write web pages for Mozilla and other browsers that support the same standards.

## Web developer documentation for Mozilla

This developer guide explains how to develop Lightning web components and documents the JavaScript functions that are unique to the programming model. This developer guide doesn't document standard JavaScript or teach JavaScript fundamentals. Standard JavaScript is documented in the Mozilla Developer Network (MDN) JavaScript Reference. If you're looking for documentation for a function, try MDN first.

## Supported JavaScript - Salesforce Lightning Component Library

At its heart, HTML is a fairly simple language made up of elements, which can be applied to pieces of text to give them different meaning in a document (Is it a paragraph? Is it a bulleted list? Is it part of a table?), structure a document into logical sections (Does it have a header? Three columns of content? A navigation menu?), and embed content such as images and videos into a page.
