The tips below highlight ways that you can help your child learn early math skills by building on their natural curiosity and having fun together. (Note: Most of these tips are designed for older children—ages 2-3. Younger children can be exposed to stories and songs using repetition, rhymes and numbers.) Shape up. Play with shape-sorters.

### Help Your Child Develop Early Math Skills • ZERO TO THREE

The early years maths activity: – Smack the Number Counting Game by Fun Learning for Kids. In a nutshell – Prepare some sticky notes with various numbers and place them in front of the children armed with fly swatters. The goal of this simple yet fun game is for the little ones to identify the number on the dice and match it with the ones written on sticky notes before smacking the correct answer with a fly swatter!

### Supporting early mathematical development : practical ...

Recognising children's mathematical ability and supporting it by using opportunities purposefully is still an area for teacher development (Gifford, 2004). In addition, recognising that teaching mathematics might be construed as pressure on the child, other teachers or parents can deter teachers from initiating any sort of mathematical activity (Linder et al. 2011).

### Strategies for teachers developing strategies for ...

A promising approach to enhance early childhood math development that leverages communication between parents and health care providers and the distribution of books during well-child primary care visits This brief presents a new approach to support the development of early math skills in young children.

### Developing Math Skills in Early Childhood - Mathematica

Support our campaign to inspire children with early maths on social media by tweeting and retweeting using the hashtag #earlymaths. Here are two suggested tweets: Inspire our children with #earlymaths in learning and through play. Give every child the chance to become a confident maths learner #earlymaths.

### Early maths | PACEY

Children develop math concepts and skills very early in life. From the moment they are born, babies begin to form ideas about math through everyday experiences and, most important, through interactions with trusted adults. Language—how we talk with infants and toddlers about math ideas like more, empty, and full —matters.

### Math Talk with Infants and Toddlers | NAEYC

New research shows that parents play a key role in helping their children learn mathematics concepts involving time, shape, measurement and number. This mathematical knowledge developed before...

### Eleven games and activities for parents to encourage maths ...

Educators of children in this stage of development should lay a solid mathematical foundation by providing activities that incorporate counting and thus enhance children's conceptual development of number. For example, teachers and parents can help children count their fingers, toys, and candies.

### The Mathematics Educator Applying Piaget's Theory of ...

Manipulatives and representations can be powerful tools for supporting young children to engage with mathematical ideas. Ensure that children understand the links between the manipulatives and the mathematical ideas they represent.
